☎ 07531941941
🏠 16 Station Road, Burton, DE13 8DR
👤 Full UK driving licence

An adaptable and hard working Masters graduate, enthusiastic to take on new challenges and always aims to exceed expectations. Creates compelling and intriguing designs by examining all aspects of the design process to bring about innovation and fresh thinking. Well suited to work on a range of projects from technical to aesthetical ones.

Has ambition to work in a multidisciplinary role, working on projects including product, graphical, user experience and more. Loves to learn new skills whilst building on existing ones and will go to extra lengths to ensure that all work is carried out to an extremely high standard.

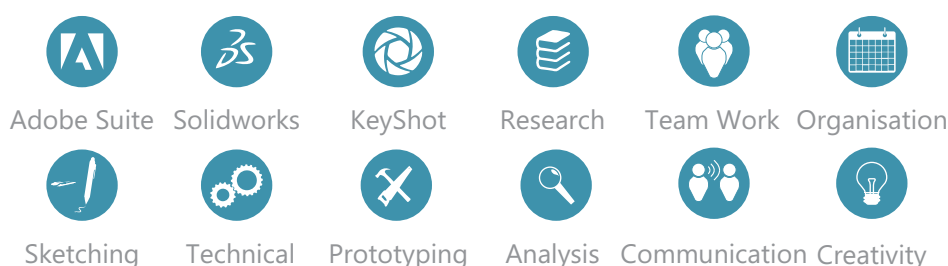

EDUCATION

- **Masters in Design** Product Design **First Class Honours** - Sheffield Hallam University Sep 2012 - June 2016
 - Showcased at: [Made North Exhibition 2015](#), [I AM exhibition 2016](#) and [New Designers 2016](#).
 - Short listed on live projects for [Morphy Richards](#) and [Timfish Design](#), and presented to [Northern Lights](#).
 - Highly experienced using the Adobe Suite, Solidworks and KeyShot for development and final visuals alike.
 - Designed a smart phone-enabled guitar pedal and app before producing a business and marketing plan for a company launch. Created a first year costing plan, including manufacture and operations, and a video pitch.
 - Experience working on technical projects and costing. Great knowledge of materials and manufacturing techniques including injection molding, rotation moulding and extruding.
 - Major project: An innovative portable oxygen tank for the consumer healthcare/medical market designed to challenge the current consumer medical market. A technical project highly sensitive to aesthetics and function.
- Millennium Sixth Form Centre Sep 2010 - June 2012
 - 3 A Levels - Product Design A, Psychology C, Maths D - AS Physics (C).
- Littlelover Community School Sep 2005 - June 2010
 - 11 GCSEs A*-C including English A, Maths A, Triple Science A.

WORK and EXPERIENCE

- **Research Assistant (Biotex Project)** - Sheffield Hallam University Feb - May 2015
 - Researched into the biocomposite material Biotex and [had work exhibited at the PLATE Conference 2015](#).
 - Used low cost, in-house manufacturing methods to design modular lighting arrangements and space screens.
 - Devised and tested innovative design and manufacturing solutions on prosthetics for developing countries.
 - Worked as a member of a multidisciplinary team, effectively understanding roles and presenting work confidently and professionally.
 - Carried out research in the form of literature reviews, case studies, liaising with experts & specialists and working on hands on physical testing & design work.
 - Visited NetComposites to manufacture high quality Biotex panels for final prototypes.
- **Retail Assistant** - Fulton Foods LTD Feb 2014 - Aug 2015
 - Part time work during studies in a customer facing role helped to grow team work and communication skills.

SKILLS

INTERESTS

I am very interested in music. I play guitar, bass and am currently learning keyboard. Cooking is a great way for me to relax, as is keeping active in the gym or playing social sports. I love to keep up to date on design and learn new skills. I have my own 3D printer too.
